

PreferenceActivity

```
classDiagram
    class PreferenceActivity
    class SettingsActivity["lab.davidahn.appshuttle.view.ui.SettingsActivity"]
    SettingsActivity --|> PreferenceActivity
```

The diagram illustrates a class hierarchy. At the top is a class box for 'PreferenceActivity', which is divided into three horizontal sections: the top section contains the class name, and the two bottom sections are empty. Below it is a class box for 'lab.davidahn.appshuttle.view.ui.SettingsActivity', which is divided into three horizontal sections: the top section contains the class name, the middle section is shaded gray, and the bottom section contains the text '# onCreate()'. A blue arrow with an open triangular head points from the top of the 'SettingsActivity' box to the bottom of the 'PreferenceActivity' box, indicating that 'SettingsActivity' inherits from 'PreferenceActivity'.

lab.davidahn.appshuttle.view.ui.SettingsActivity

# onCreate()
